California State University Northridge

Experience

Career Foundry Frontend Development for Designers

January 2021- March 2021

Intensive project-based training program with a focus on coding with HTML, CSS basics and layouts, Advanced CSS for Designers, and JavaScript

- In this course, I was responsible for developing a portfolio website from the ground up using HTML, CSS, and Javascript.

Career Foundry UI Immersion

July 2020- January 2021

Intensive project-based training program with a focus on design principles, user experience design processes, user interface design processes, mobile app design for iOS & Android, animation, and branding.

- Used Sketch and Invision to create a diverse range of developed apps and responsive designs. By gathering requirements to conduct MVPs, user research, personas, user testing, user flows & diagrams, style guides, mood boards, wireframing, prototyping, and branding.
- In the immersion course, I engineered many of the apps using Lean UX and design principles. Five objectives; a responsive recipe app, a to-do list app of my choice using iOS and Material Design's guidelines, an eCommerce brand with completed brand guidelines, a messaging app ready with a style kit for future teams and iterations, and a note-taking app for a client without deliverables.

Executive Pastry Chef | December 2017- February 2020

24 Carrots Catering and Events

- I worked closely with Executive Chef to collaborate and share ideas for creating custom menus for high-volume and specialized events.
- Re-Designed our fine dining, social, and holiday menu; executing and training these menus in-house and on event sites.
- Worked closely with the art and marketing department to assist and curate photoshoots; food styling. Sketched and designed an interior wall space for the main office.
